"All The Time"

Visit "[All The Time](#)" on MotoLyrics.com

Friday night everybody's getting happy
I think you lost your style
Maybe we'll be here a while
What is said and what is just suggested
I think you already know
Just what you wanted to do
And where you'd end up
- chorus -
It's all the time, it's all by myself
It's all the time, it's all the time
And far below are all the things we take for granted

I wanna bleed now it's all gone, all the time
- -

Have you ever had to give up something special
For the scars that you've gained
Sometimes you find the truth you go insane
Screaming inside cause you want to elude it
There's no wrong or right
Go on and live with no regrets
You only have one life
- chorus -

All the time, all the time, all the time
This box of pictures
Regrets and memories
I haven't found out quite yet
What i want, what i want
So have you lost them
They got stuck inside your past
All the time i've fought for and all i've wasted
- chorus -
All the time, all the time, all the time, all the time, let's
go
So far below, so far below, so far below
