don't make me try to listen  
to that ska-core crap  
just bust out some metallica  
or pop in spinal tap  
you say that metal's stupid  
wrong i think you need a reason  
that's why i wrote this song  
you say i don't care cause Satan is my best friend  
oh i don't know but its alright  
i want you to know i don't know what you said

cause something you should know my friend  
is its much too loud for me to hear  
i bash my head repeatedly  
hard into the wall  
and fast i will will i repeat brain damage  
will i fall you can't expect that?  
you don't think that's alright?  
well i don't care cause  
i'll listen to metal all night!
