Couldn't help  
To notice you  
Standing in the hall way  
Tears rolling  
Down your face, girl  
I heard him tell you  
That he was sorry  
For breaking up with you  
But you're way  
Too beautiful to cry  
Soon as he walked away  
I came up from behind  
I told you a joke  
To make you laugh  
I'm nothing  
Like him girl  
You do the math

Chorus  
Me plus you  
I'll take that number  
Multiply your smile  
Minus the drama  
Give me a fraction  
Of your heart  
I'll solve your problems  
Now put that together  
We make up  
A perfect equation  
Equation, equation  
Me and you make up  
A perfect equation  
Equation, equation  
Me and you make up  
A perfect equation

And you can count on me  
Forget about your past  
I'll always put you first  
Never put you last  
Girl  
You're my absolute value

Have no fears  
I'm here to save you  
Promise I won't change  
I won't play those games  
Even when it rains  
My feelings  
They stay the same  
Put me to the test  
I haven't failed yet  
Trust me I'll pass girl  
Just do the math cause

(Chorus)

(Me and you make up  
A perfect equation)  
You deserve the best  
Nothing less from me  
Hold your hand  
Open doors  
Treat you like a lady  
All your dreams  
Will come true  
Baby  
When you're with me  
Don't fight yourself  
From him  
I'm the half you need

(Chorus)
