Verse 1. Widdle me away, Shape my soul, Run it in the ground, Rattle my bones, Now the light of day, Too far gone, Listen to the sound, Driving it home. You know you missed the point, YouÃ¢ know you missed the mark, You gotta love me in the light, To love me in the dark, And now I know you understand, You know you had it coming, Put the pistol in my hand, And then you started running.

Chorus. Come pick your poison, Let all the noise in, Take anything youÃ¢ want. No need to explain, I know how this came, Don't you assume I don't. Oh, I said you're easy on the eyes and it comes as no surprise and if we want each other cock it, and pull it, you run for cover and I'll take the bullet.

Verse 2. Counting on tonight, Stuck on you, Counting on a fight, Punch drunk true, Sorry I returned, Sorry I was late, Now the tables have turned just a simple twist of fate. Don't it make you feel small, In light of the world? Don't it make you feel tall, A beautiful girl? She said I know the plan, I know what I got coming putÃ¢ the pistol in my hand and then you started running.

Chorus. Come pick your poison, Let all the noise in, Take anything youÃ¢ want. No need to explain, I know how this came, Don't you assume I don't. Oh, I said you're easy on the eyes and it comes as no surprise and if we want each other cock it, and pull it, you run for cover and I'll take the bullet. (Repeat)
