WIRED (by stun)

no more reasons for being late
no more lies to be afraid
100 thoughts to prove yourself
and 200 problems of someone else

say goodbye and leave when the world falls asleep

no more pressure for the fold
no more stories to be told
100 people to recall
and 200 battles after all

say goodbye and leave when the world falls asleep

when the weakness gets to strong
the future will be gone
but we never fall asleep
100 thoughts to prove yourself
200 problems of somebody else
but we never fall asleep
100 people to recall
200 battles after all
but we never fall asleep
