I was sittin at the bar with my buddies
Discussing the state of the world and
Everyone had an opinion
And then somebody turned and asked Earl

Is the stock market gunna recover
Or will it wind up in the pain
He looked down at his glass of bourbon
I love her she hates me i drink

Wallstreet don't run out by my house
I don't put much stock in their game
Just 3 things in this world concern me
I love her she hates me and i drink

Well he went back to minding his memories
For a while there we left him alone
We went back to mindin' our business
Then the cowboys and packers came home

We tapped ol' Earl on his hsoulder
And asked who do you like in this game
He said for me the games over
I love her she hates me and i drink

You can count all the winners and losers
And one thing i think don't change a damn thing
Just three things in this world concerns me
I love her she hates em and i drink

Go and leave me the hell alone

Yeah wallstreet don't run out by my house
Its far crap from memory lane
Just 3 things in this world concern me
I love her god she hates me i drink
