

## Darren Styles "Save Me"

Visit "[Save Me](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I have been waiting all of my life  
For you to come along and make everything alright  
My body's shaking right through my bones,  
So take me by the hand please don't leave me here  
alone.

And I wonder if you know just how I feel, I feel. yeah  
And I wonder how I know if this is real, is real.

[Chorus]

Cause I want you to save me, just please save me, save  
me.

Cause I need you to save me, just please save me,  
save me.

Cause I want you to save me, just please save me, save  
me.

Cause I need you to save me, just please save me,  
save me.

I have been waiting all of my life  
For you to come along and make everything alright  
My body is shaking right through my bones,  
So take me by the hand please don't leave me here  
alone.

And I wonder if you know just how I feel, I feel. Yeah  
And I wonder how I know if this is real, is real.

[Chorus]

Cause I want you to save me, just please save me, save  
me.

Cause I need you to save me, just please save me,  
save me.

Cause I want you to save me, just please save me, save  
me.

Cause I need you to save me, just please save me,  
save me.
