### "As The World Burns"

Visit "[As The World Burns](#)" on MotoLyrics.com

Extermination of our planet's fertility  
The world in danger, no one will realize  
We go forward to termination, endless compromise

Pyromania  
With no concern  
The sun destroys  
As the world burns

Disintegration of the ozon layer,  
Worldly cremation, lethal burning rays

All wars will be forgotten  
When the sun will scorch the earth  
The effects on humanity will not allow rebirth  
Skin cancer like a plague  
Too late to turn back  
The green world once ours  
Has now turned black  
All wars will be forgotten  
With global warming trends  
The flooding of the coasts  
Bring us close to an end  
The earth becoming deserts  
No second chance  
We will become exposed  
And watch the world turn to black

Extermination of our planet's fertility  
The world has changed, finally realized  
Forward to termination, no more compromise
