Lyrics : Constantine

I Could Really

I could really see it
On the road
And really walkin' it
With real words and true intentions
And a promise for every occasion

I could really see it

What could be
When there's room to breathe
You can know why
Just turn inside

I could really feel it
When you say it

You really mean it
With true words and real intentions
Believing all your premonitions

I could really feel it

I could really be it

What could be
When there's room to breathe
You can know why
Just turn inside

I could really see it
I could really feel it
I could really be it
