The battle happened in heaven
The battle happened a long time ago.
Satan in a rage I think it's something, we all should
know
The devil took by side one third of I heaven to fall with
him
And now the demons they cry and the false prophets
burn with them
Well you know it's not safe to go out at night
His wrath comes so quick but my God never lies
Welcome to abyss I hope you have fun
Look for the masquerader Look for the one who lied
He's dressed like Dr. Jackal But he's really Mr.Hyde
He wants to deceive you he wants to drag you down
besides
There is another choice and by his strength the dragon
dies.
And you know it's not safe to go out at night
Life in fear, that's your right
So do you get the drift? About spiritual suicide
That comes with following the devil He wants to see
genocide
He wants to rip off your flesh he wants to poke out your
eye
He's trying to get you in trouble and yes he wants us all
to die
But you know it's not safe to go out at night
His wrath comes so quick but my God never lies
Don't want to see you in abyss You're not going to have
fun
Forever is a long time when there ain't nowhere to run
Don't want to see you in abyss
