(Chorus)

I was aiming for the sky, ended up flat on the ground
But once again the sun is rising, I better keep on walking
Keep on walking

I have a long road ahead of me
It's cloudy and dark, it's hard to see
Will I ever get through to the end?
Been down this sling so many times before
And I told myself I won't do it no more
Now I'm back on the same road again

(Chorus x2)

I was aiming for the sky, ended up flat on the ground
But once again the sun is rising, I better keep on walking
Keep on walking

There's some twists and turns I've gotta clear
And when I'm done the end will soon appear
I can leave my troubles behind

(Chorus x2)

I was aiming for the sky, ended up flat on the ground
But once again the sun is rising, I better keep on walking
Keep on walking

I never stopped believing
I know what I should do, just let the light guide me through

(Chorus x4)

I was aiming for the sky, ended up flat on the ground
But once again the sun is rising, I better keep on walking
Keep on walking
