If I could  
You know I would  
Take you with me 'cause I swear there ain't no place  
better  
People say I might not be worth the wait  
But for someone who just learned to fly I couldn't get  
much higher

It's all about the rock and roll  
Intoxication of the heart and soul  
You know it took a while to get me here I'm gonna make  
it last  
All pumped up in my rocking chair  
With my attitude and my savoir-faire

So excuse me if I come around your corner A little too  
fast  
And make a superstar car crash  
Superstar car crash

If I could  
You know I would  
Take you for a ride in my celebrity mobile  
It's not about  
If you can scream and shout  
And it's not about changing the face of a generation

It's all about the rock and roll  
Intoxication of the heart and soul  
You know it took a while to get me here I'm gonna make  
it last  
All pumped up in my rocking chair  
With my attitude and my savoir-faire  
So excuse me if I come around your corner A little too  
fast  
And make a superstar car crash  
Superstar car crash

Hey mama can you see me now...?
