(Allen, Dubin, Savigar)

When we kiss that way  
I search for words that  
Might explain  
How can a love go so deep  
Girl, it's in my blood  
It'll always be a part of me  
If we stay together  
Or if we go our separate ways  
I know... love will last forever

The sun may someday lose it's light  
The moon may not shine one night  
Your heart will always have a home  
It is written in stone - written  
In stone

Seasons go by and minds  
Have changed  
But I will never doubt why I  
Feel this way  
It goes on so strong  
Like a solid rock  
Even when the moment's gone  
Nothing lasts forever  
But one thing's sure to stay  
The same  
Our love... the love is getting better

The sun may someday lose it's light  
The moon may not shine one night  
I know just how the story goes  
It is written in stone - written  
In stone

True love is timeless and  
Unconditional  
You don't need to read the writing  
On the wall  
I can see the future - happiness  
Won't fade away

The sun is in the sky just like it  
Was yesterday  
Love will last forever

The sun may someday lose it's light  
The moon may not shine one night  
Your heart will never be alone  
It is written in stone - written  
In stone

True love is timeless  
It will grow through smiles  
And sadness  
Won't you walk with me  
Our love, it will be forever  
I know sometimes you might not  
Believe it  
But baby I'll do my best to show  
You, let you see it  
Time might not be so bad  
I know we'll come out ahead  
Love is timeless  
Timeless and unconditional  
You don't need to read the writing  
On the wall  
It's written in stone  
Happiness won't fade away
