You burn me up i'm a cigarette
You hold my hand i begin to sweat
You make me nervous
Ooh i'm nervous
It must be real bad karma
For this to be my dharma
With you

You burn me up i'm a cigarette
Life with you is a loser's bet
You make me crazy
Ooh i'm going crazy
Your therapeutic antics
Well they really make me frantic
With you

Strategic interaction irreducible fraction
Terminal inaction and a bitter hostile faction
I'm getting anxious
I'm franxious
Transactional diseases are the only thing that pleases
We

You burn me up i'm a cigarette
Demanding my attention which you're not gonna get
What did the sage mean?
What had the sage seen?
Musical elation is my only consolation
Oh yeah

You burn me up i'm about to ignite
When you tell me you love me i give up this fight
I'm feeling put down my feelings shut down
I want rejuvenation from male emancipation

Strategic interaction terminal inaction
A bitter hostile faction irreducible fraction
Transactional diseases are the only thing that pleases
We
