"Love Song For Karen"

Visit "[Love Song For Karen](#)" on MotoLyrics.com

Karen when you don't pick up the phone
I think about the possibility that
Aliens have taken you
And I would have to walk this world alone
Wondering if you were happier
Up there in the stars so shining bright
And in this San Francisco light
You cut through the morning fog
Hold my hand until we are inside
Until we feel alive again
All is said and done
There's one thing that I know it's

[Chorus]
I need to be with you
It's all that I am all I wanna be
And I can never be without you
Heads together stuck like glue
Forever two in one and one in two
Heads together stuck like glue
Forever two in one and one in two

When our body parts begin to
Turn to nuts and bolts
Our two hearts won't realize that
They are getting old
If there comes a day when my
Robotic arms can't hold you in your sleep
I know we'll find ourselves
Together in the deep

Chorus x 2
