In the name of hatecraft
In the name of their blood
In the name of the night
In the name...

Look inside the executioner's hood
I feel no mercy but I will let you meet him well
Come with me upon the scaffold
I will show you his grimace
Hard to read and understand

Come with me upon the scaffold
I will lead you through the horror
Look inside executioner's hood
I will show you his grimace

You can not hide from me

A shocking and blasphemous vision
Making sick with smell of blood

I am the blasphemy stealing your freedom
I insult and I hate
I arouse fear and prayers
Nobody dares to look into my eyes

Whose face has the executioner?

Come with me upon the scaffold
I will lead you through the horror
Look inside executioner's hood
I will show you his grimace
