Hate me! For what I am  
You can't get anything from me  
You're just wasting your time  
We will end up nothing at all

So please, I'm letting you go, I'm letting you go  
Cause I know we won't make it at all

[Chorus:]  
So go! Step out and runaway from me  
I'm not the one whom you thought I will be  
Just go, I'm setting you free  
Cause when you're awake I'll be your nightmare

Leave me! There's nothing we can do  
This will end before it even begins  
Just pretend that I don't even exist  
And move your life, leave everything behind

So please, I'm letting you go, I'm letting you go  
Cause I know we won't make it at all
