I'm fascinated by the openings in human body  
But not by the natural ones

Like a madman  
I stab knife into a woman  
But I don't wanna kill her  
Her suffering begins

The best are those created by knife  
Steel rod isn't so bad too

Vagina nauseates me  
Anal cavity is lothesome  
I enjoy fucking the body  
I enjoy the new openings

Creation  
Of new bodily cavities  
Penetration  
Among the torn tissues

How many solied pensies  
Had visited your fleshly cunt

I want to be first  
And deflower even your stomach

I purr like a cat-man
