Feeling points, the stars of milk  
solar mammoth of all cosmic silk  
burnin' through the cyber-space land  
transforming nucleous, flyin' astralman

With the power in his head  
the universe is dead

Moon planted flowers with speedin' power  
lick the planets under friendly towers  
stealing objects with the burning suns stare  
ecilpse the tunnels, running from the bare

Dawn love disciples uncoil into stone  
forcefield of crimson, eat the suns bones  
roam violet rays, in celestial spaciousness  
plastic moonbeams, flyin' listlessness

With the power in his head  
the universe is dead
