Put the best smile you can upon your face,  
Get ready, take the leap from me, let's all go,  
Even if a strong wind blows against you,  
Prove you can try, don't give up hope,  
You should head for the big blue sea and then,  
The wave will whisper in your ear, you'll see,  
You have the power to conquer your fears,  
Now do the best thing you know,  
And tell your heart "No need to cry",  
And you will see the light and then start to shine,  
And you can get happiness,  
She'll let you two atop the world,  
Your faith becomes the courage to live all your days.
