I, I wanna make you cry
I wanna make you bleed
Just for everything

And you, you wanna take my place
Because I don't love you
And the temper of me

See, We'll never be again
Just get it out of your head
Well, it's just not happening

It won't be the way it was
It won't be the way it was
It won't be the way it was
It won't be the way it was

And when you're lying in the shallow grave
Don't run to me saying you changed
Well all I see still you are the same
Don't run to me

It won't be the way it was
It won't be the way it was
It won't be the way it was
It won't be the way it was
