Oh no, no
Oh no, no

Sometimes I wish I knew your name
At times I want to say hello
But you seem so far away
To let my feelings show

And though I don't know what to say
I feel that someday soon one day
Love will place you by my side
And it shall be our guide

And then manana sera se si
Means our love will always be
Something special and also true
Girl I long to be with you

Oh manana sera se si
Means our love will always be
Something special and also true
Girl, I long for you

When I have you by my side
You will always be my pride
Love so simple yet so sweet
I do think you're all I need

So I thought I'd let you know
That my heart forever grows
Closer to your warm embrace
Every time I see your face

And then manana sera se si
Means our love will always be
Something special and also true
Girl, I long to be with you

Oh manana sera se si
Means our love will always be
Something special and also true
Girl, I long for you

Oh, oh, oh, oh, oh
Oh, oh, oh, oh, oh

And so manana sera se si
Means our love will always be
Something special and also true
Girl I long to be with you

Oh manana sera se si
Means our love will always be
Something special and also true
Girl, I long for you

Do you know I don't know you?
I wanna show you I do love you
That I do do, do love you
Oh babe, I think about you
Even though I don't know you

I wanna show you I do love you
And that I do do, I think about you
Oh babe, I do love you
Even though I don't know you
I wanna show you I do love you
I think about you
Oh do do, oh do do, oh do do

And then manana sera se si
Means our love will always be
Something special and also true
Girl, I long to be with you

Oh manana sera se si
Means our love will always be
Something special and also true
Girl, I long for you

And then manana sera se si
Means our love will always be
Something special and also true
Girl, I long to be with you

Oh manana sera se si
Means our love will always be
Something special and also true
Girl, I long for you
