Darling, we're both scared  
But where love is, fear won't tread  
All of these friends here agree  
We're right where we should be

Underneath all your white  
My Lady, My Love, My Bride  
In your darkest hours  
Will I love you still  
I have and I always will

I guess it's because I just do  
Following heaven's clues  
This is a big mystery  
How I found, you found me

Underneath all your white  
My Lady, My Love, My Bride  
In your darkest hours  
Will I love you still  
I have and I always will

And you are changing now  
Your part of me somehow  
And I will never be alone

In your darkest hours  
Well I love you still  
I have and I always will  
I have and I always will
