Don't let them know
You're watching the situation crumble.
[situation crumble]
These things, they take time...
And they know, yes, they know they should be better
now.

She's watching me awkwardly from a distance.
Should I care?
Is there something more I should have known?
I know that I wonder.

They took his crown.
There's nothing more left of him now.
[but he will be okay]
I appreciate, now that they choose to ignore...
I can't set her free to go without a payment plan.

She's watching me awkwardly from a distance.
Should I care?
Is there something more I should have known?
I know that I wonder

Will she go... or follow?
Follow, please follow me home.
[Me home...]
Follow, please follow me home.
This won't end like last time...
The things you swore, they never made me feel
anymore

She's watching me awkwardly from a distance.
Should I care?
Is there something more I should have known?
I don't need to wonder.
