You can make it alone, oh if you try
Till the beat come on, I know you sing it
You can make it alone if you try
We'll never see you fall 'til you make it out
When are you with them if I let it go
You'll either gonna rock the boat
Or help with them hand it out
Now you're somewhere remove and think you got it
while you're broke
Or are you passin' out
Something that you wrote
It's gonna make a good life quote asylum for the call
Rumblin' below, say now now you never go
So while we're waiting
It's what you know but you can't tell us so
Just where it you let it go, for fear they'll turn it down
You can see through the smoke and though you know
that's something wrong
You're holding on for now
Aiming for the mark, how is it that your score's not up
Like flashlights in the dark
Even with a heart, you know you're better from the start
Don't let it weight you down
Oh now you leave them alone, you're on your own
