"I Can Tell"

Visit "[I Can Tell](#)" on MotoLyrics.com

We try, but Avalon is always beside me.
And I'm falling apart, where is my heart?
A riot grows and his eyes open up.
I once believed I would set you in line.

If only I had the strength then maybe you could believe
in something else.

If you keep asking me I'll melt away in the summer air.
It won't hurt half as much and I'll beg for you to stop it
now.

If you keep asking me I'll melt away in the summer air.
It won't hurt half as much and I'll beg for you.. just tell
me something.

But through and through, the alpha waves and power
cables everywhere.

Exercising self-control

The child calls and he lies open

I would believe if only I'd been thinking at all.

If only I had the strength then maybe you could believe
in something else.

If you keep asking me I'll melt away in the summer air.
It won't hurt half as much and I'll beg for you to stop it
now.

If you keep asking me I'll melt away in the summer air.
It won't hurt half as much and I'll beg for you to just tell
me something
