"Let Go Control"

Visit "[Let Go Control](#)" on MotoLyrics.com

And i know
That i should let you go
To let you be with all the thoughts you loathe
Awake and stare across the sea
In hopes that you will dream
But nothing's free

We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one
We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one

I'll give you time to spend alone
And once the pain is gone, your light will let us know
Set free, now you can try and speak
The words that you would see
I already know

We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one
We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one

We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one
We take our lives

We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one

We changed our lives
We'll never die
This chance wont be the last one
This chance wont be the last one
We changed our lives
We'll never die
This chance wont be the last one
This chance wont be the last one

We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one
We take our lives
We'll never die
And we'll learn what was right
This chance wont be the last one
This chance wont be the last one

We take our lives
We'll never die
And we'll learn what was right
We take our lives
We'll never die
We take our lives
We'll never die
