Kala-azar... the anathema of the black illness

Kala-azar... kala-azar!

In the Indian forest, the black illness is hidden,

Surrounding in the environment!

Infecting the children, the venom in their blood,

Feeling a fucking pain!

The colour of their faces is totally lost,

But they are still alive!

Nobody suspicious... it is a lethal virus

Fucking them with diarrhoea... intestinal decay

Dying in abeyance... looking into the abyss
