It's not every day someone's laugh makes me high  
Not every day someone's voice makes me sigh  
It's not every day someone's touch makes me cry

It's not every day someone enters my dreams  
Or fits right inside me right up to the seams  
It's not every day  
And I've waited forever, it seems

Yes you my friend are a rare rare find  
You're just the right fix for my body and mind  
And all of those others are just wasting my time

Who knows the reason we met  
But one thing's for sure and I'm willing to bet  
You're gonna be someone I'll never forget  
Because you make me happy and you make me wet

And you my friend are a rare rare find  
You're just the right fix for my body and mind  
And everyone else is just wasting my time

I thought I was done looking for the one  
I gave it the best shot I could  
But it had barely begun before it just wasn't fun  
Oh this time it's gonna be good

Cuz it's not every day someone comes my way  
Who thrills me enough to get me to stay  
Cuz I'm so used to keeping em safely at bay

You my friend are a rare rare find  
You're just the right fix for my body and mind  
You're better than drugs you're better than sugar  
and wine  
You make me write love songs  
And you make me shine

Yes you my love are a rare rare find
