(Verse)

Once, we did run
How we chased a million stars
And touched as only one can
Once, we did play
How the past delivered you
Amidst our youth we'd dream away, away

(Chorus 1)

As if I knew the words I'm sure you'll hear
Of how we met as you recall so clear

(Verse)

Once, we did love
Long ago how did I forget
Holding you so closely
Look, how I move
Chance would have me glance at you
To know how you move me, move me

(Chorus 2)

All barriers fall around us as we hear
Of memories known and not so long ago, so clear

Once, we did run
How we chased a million stars
And touched as only one can
