You think it's over
But it's not over
Till it's over in your heart

I thought I'd see it
See it coming
See my future fall apart

Chorus:
Well I had to do
What I had to do
To get over you
To move on
I had to find a place
Where I could forget your face
Where I could finally say this is wrong wrong wrong

Chorus
You aren't who I thought you were
I don't think you're over her
We had a lot but not enough
And what was left you can't call love
You can't call love
You can't call love
As much as I thought it was

It hurts to say it
We almost made it
But almost
Isn't good enough

I feel like dying but
You won't see my crying
I'm just tryin to be tough

Chorus
