Life like a b-side, a medicated verse  
Fall in the frontline, and back to middle earth  
Mannequin woman, can't set myself in motion  
Feel the blood pumping but cannot find a pulse

Oh I just don't, just don't know, know, know  
(repeat)

Spent a month to be quiet, a few days to be cool  
My friends were my counselors, and they told me what  
to do  
There's always a point, a point of no return  
Always something to give up  
Always something to learn

Send my brain in circles, shed my bitter skin  
Still a mannequin woman  
Can't set myself in motion

Oh I just don't, just don't know, know, know  
(repeat)

Just don't know (repeat)
