

Satellite Soul "Great Big Universe"

Visit "[Great Big Universe](#)" on MotoLyrics.com

You send me many places that I do not wish to go
Well, I've had my doubts, You know I believe it's right
From the red brick streets of Manhattan to the Gulf of
Mexico
I will say it out loud and I will sing it with all of my might

Well, it's one great big universe
And He's teaching my heart how to fly
Well, it's one great big universe
But I've got my piece of the sky, yeah

Even though it's six in the morning, I am wide awake
'Cause I'm leaving again, gonna take this old guitar
and go
Gonna sing and tell You I love You though I do not know
Your name
And I'll try to explain all the things that I need You to
know

And I do believe what He said to be true
Well, it's better to live for today
So I'll hit the road with this vagabond crew
And we'll sing this old song all the way
