When you find yourself inside a bubble, hold your cloak  
and wait for me.

Always follow orders, little bees

And in your hour of darkness, you will hear instructions  
come from me.

Always follow orders, little bees

Little bees, little bees, little bees, little bees, wait for  
your instructions, little bees.

And when the op has gotten started, people in the fleet  
agree.

Gang chat we will answer, little bees

And though we may be parted(not sure on this), there  
is still a chance that we will see.

All your corp mates waiting, little bees

Little bees, little bees, little bees, little bees, x for POS  
destruction little bees.

And when the systems lagging, you can lay the blame  
on CCP.

Whine until tomorrow little bees

I wake up to the sound of music, Uncle Suas sings to  
me.

Drunken words of wisdom, let it be

Little bees, little bees, little bees, little bees, speaking  
words of wisdom little bees,

Little bees, little bees, little bees, little bees, x for POS  
destruction little bees.
