

Save Us For Summer "Rocking Your Body"

Visit "[Rocking Your Body](#)" on MotoLyrics.com

you've got the body and the looks that kill
and your eyes let out what your lips can't spell
i've got the touch and a kiss that will
make a girl like you want to take me home tonight

i'll never let you know
and i'll never let you go
i'll never let it show just how much i want you
i'll never let you know
and i'll never let you go
i'll never let it show just how much i want you

this room never let's down
as the pace get's fast
and the sheet's start singing along
your face says it out loud
so let it out now
and give it up now baby come on
let's do it right, so we get better
and dim the light's
as we're working our way to the bed
we'll make this night
that much better
so hold on tight
while im rocking your body again

where's everybody when the lights go out
while the two of us
we turn this night around
i'll let you touch, i'll let you kiss, and let you feel
i'll let you move until your body says it's been my thrill

i'll never let you know
and i'll never let you go
i'll never let it show just how much i want you

i'll never let you know
and i'll never let you go
i'll never let it show just how much i want you

this room never let's down
as the pace get's fast

and the sheet's start singing along
your face says it out loud
so let it out now
and give it up now baby come on
let's do it right, so we get better
and dim the light's
as we're working our way to the bed
we'll make this night
that much better
so hold on tight
while im rocking your body again

get down cause im gonna take this night out with you
to let out all these things while im beside you
so hold me tight get it right so we go now
break break away
let's go tonight

this room never let's down
as the pace get's fast
and the sheet's start singing along
your face says it out loud
so let it out now
and give it up now baby come on
let's do it right, so we get better
and dim the light's
as we're working our way to the bed
we'll make this night
that much better
so hold on tight
while im rocking your body again
