Say goodbye to the masochist, there'll be no more of this

Locking myself in the darkest of rooms
Just for a hook to sing, my understanding is tainted by
an ongoing trend

Love and let love, a new genesis for my claim to
consciousness
When all is lost, that's when you start finding what
you want

I always believed that I'd die very young. I didn't see
a future beyond 28
But all that is changed. I've found in my mother's
faith the meaning of life
Is not praxes of celebrities

Love and let love, a new genesis for my claim to
consciousness
When all is lost, that's when you start finding what
you want

She takes that bottle straight to her brain
Tonight she will be dancing the night away
But don't you be confused, it's not to escape.
There's a lot of good friends in town
The sing uh oh uh oh uh oh. Love the one you're with,
love the one you're with baby.

Love and let love, a new genesis for my claim to
consciousness
When all is lost, that's when you start finding what
you want
That's when you start finding what you want
