"One Look"

Visit "[One Look](#)" on MotoLyrics.com

I saw you in the hall you were sitting on the stairs
You were looking at everyone and slowly
You turned you head at me and I had to close my eyes
Cause you smiled at me and it made me blind
It took a few minutes to fin back my sight
Then you went away and I still don't know your name
But you stay in my mind, you go and come around
You hypnotize me oh wo wo

It took one look to send me on the orbit
It took one smile to embark on that spaceship
Flying to the speed of light
If you give me a chance to hold you in my arms
A little chance to catch a glimpse of your heart
Then you would be the one, girl.
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you

Never felt like that
Girl you spin me 'round
Don't be afraid or shy
I am an honest guy
Let me take you now
Don't you look back now
You can do it baby
Make this moment last
Get ready oh oh
I'll keep you safe and sound
oh oh, yeah hold on tight
This is the fastest ride
You can trust in me

Because I will be your guide
On your way to paradise

It took one look to turn off gravity

It took one smile to embark on that spaceship
Flying to the speed of light
If you give me a chance to hold you in my arms
A little chance to catch a glimpse of your heart
Then you would be the one, girl
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you
(wo oh oh oh oh)
I'm falling for you

Girlie take my hand and accompany me
Across the milky way and galaxies
We'll be happy, Oh yeah we'll be happy

It took one look to send me on the orbit
It took one smile to embark on that spaceship
Flying to the speed of light
It took one look to turn off gravity
It took one smile to embark on that spaceship
Flying to the speed of light

Fly to the speed of light

You changed me, you brain-washed me
And no I can't go back to my reality
You changed me, you brain-washed me
You're the one that got me stuck here for eternity

Let me keep you in my spaceship.
