There is something I can tell you but I don't know if
anything is cool
Lately I don't know why it is my life's caught in a whirl
Any time I'd spend with you was always passing time to
me
Lately I don't know why it is my life's caught in a whirl

Every time you would say
I don't mean a thing to you
What else is there to do
But it's hardest to obtain
All the things in life that make us stronger

This crime on my hands
Faced with life on the stand
As I fray from the world
And what everyone else is called
This crime on my hands
Faced with life on the stand
As I fray from the world and change

Regardless of what you may think I know you'll never
change my ways
And every time I'd see you look away I'd try to
Even the score with no delay until it all makes sense to
me
And consequence is priced that I will pay

This crime on my hands
Faced with life on the stand
As I fray from the world
And what everyone else is called
This crime on my hands
Faced with life on the stand
As I fray from the world and change
