# "Forgive Me"

Never ever a dusted day that won't fall to failure  
Never find that belonging stage in which you're my  
saviour  
However I try things seem like you'd love to dismiss me  
Wondering why, please tell could you care to kiss me?

When times are hard I just wanna go  
To the other side and leave this  
Private hell I always walk  
If I go, say will you forgive me?  
Doing it all just to show you time is right  
Come on so say you don't leave me  
Doing it all, even carved my blood in stone  
If I go, then say you forgive me
