No pussyfootin' or that look of surprise  
Can't hide the holes in your eyes or cover up that bitter  
smile  
All the birds can see that you're heading south  
That mirror deep in your mouth reflects you running on  
for miles

When you cut the lights out think of me  
When you cut the lights out think of all the things you  
can't see  
But are they real?  
That face will be revealed

Nobody's callin' that payphone in your mind  
I wonder just what they find but that line's busy all the  
time  
I ain't got nothing but your seed on my face  
You'll put them babies to waste without your finger in  
the pie

When you cut the lights out think of me  
When you cut the lights out think of all the things you  
can't see  
But are they real?  
That face will be revealed

My mama told me one thing I'll remember till I die  
The one you want the most will be the one that you defy  
The times they're gonna love you  
Like stitches in the scar  
You can never run from trouble  
'Cause there ain't no place that far

When you cut the lights out think of me  
When you cut the lights out think of all the things you  
can't see  
But are they real?  
That face will be revealed
