I Believe
(Ad libs)

When I was younger, I never needed anyone, no no no
I didn't believe in real love, no I just couldn't feel love
And for so very long I tried to make it on my own
But night after night, man after man
I can feel in my heart something
Missing deep inside

Oh I was so very lonely
And I began to wonder if I'd ever love
But you walked in and then suddenly - I believe
Love has taken me over
And walked through that door - I believe
Reaching out to each other like never before

(Ad libs)

Now I want to shout about the way you make me feel
Oh baby
I never knew love like this before,
Cos you opened that door
Let's sing it on out yeah,
You really turned my life around
Cos day after day I hope and pray
That our love's gonna stay like this for ever

Oh I was so very lonely
And I began to wonder if I'd ever love
But you walked in and then suddenly - I believe
Love has taken me over
And walked through that door - I believe
I believe reaching out to each other like never,
Like never before -
I believe yes I believe

Ain't no stopping us now,
Ain't no stopping us now
(Repeat to fade)
