"Came Without Warning"

It came without a warning
No one just knew
Except the ones who were doing it to you
Looked all around
It came without a sound
Was no reason, no time
No warning, not a sign

It came without a warning [x4]

It came from beyond
When they dropped the bomb
You were watching the Brady Bunch
While your brain was out to lunch
Fast food fed on Captain Crunch
Drowned in atomic punch
Gone in an eternal munch
You didn't even have a hunch

It came without a warning [x4]

Came without a warning [x3]

Came without a warning [x3]
That's why we warned you!
