I'm your demon
I'm you dark side
I'm your final warning
Look up close
See my horn's growing
Do it all completely knowing
It's darkness, darker to get me going

It's just your angle one
It's just your tongue of fire
Your ravens of the night
Your soul that I desire

It's what I make you feel
It's what I make you dream of
The serpent in my smile
Are waiting here to love you

(Chorus)

It's just that you're the hellion
That's making me so reckless
It's just that I'm the dragon
That's leaving you so breathless

It's what you make me feel
It's what you make me dream of
This magic here is real
And it will not destroy us

(Chorus)

Even when hell's all around
You can come
Make me feel like a vixen a star band
And you can't save me, from darkness
Cause it isn't every thing it's cracked up to be

I am your demon
