In 1989 the illuminati created the perfect killing machine
It was far too powerful to unleash at the time
Sent to the basement bunkers of Area 51 he sat
Next to the wreckage from Roswell for approximately
1328 years

In the new world
Technology far beyond what you can fucking imagine
He will save us from the threats out beyond Zeta
Reticuli
Like the terminator
But not really because of copyright infringement suits
He is gonna be the one who kills all those
motherfuckers yeah

And you claim to be the baddest motherfucker in 3317
Laser propelled cyanide hypodermic bullets
Loaded in your future gun robbing a defenseless alien
being
Yeah you're fucking cool...
Terminated in the year 3317
By the perfect killing machine of our time and your
time too

Nobody fucks with the terminator of 3317
Nobody fucked with him for 1328 years
Because time had to catch up with him
Time had to catch up with him
He was just that fucking powerful man
