A thousand voices
Are telling me I made
The wrong decision
This time, I won't listen
I never felt so alone
All night waiting by the phone
Wondering when you will call, if at all

And I miss you
Miss you more than anything
Anything in the world
And I need you
Need you more
Everyday, in every way
Your right beside me

I've waited so long for you
Each night waiting to pull through
Oh if only you knew
How I always loved you

And I miss you
Miss you more than anything
Anything in the world
And I need you
Need you more
Everyday, in every way
Your right beside me

And I miss you
Miss you more than anything
Anything in the world
And I need you
Need you more
Everyday, in every way
Your right beside me

Your right beside me

Your right beside me
