It's a shame, but it's funny how I  
Could never find the words to describe  
How I feel, so restless for more  
Guess I'll wait like I've waited before  
So pleased to know we will get there in the end  
To leap the ride and take a step back from the edge  
The sinking ship has left me for dead  
Nothing to lose but the mess in my head  
And you could call, you could call me anytime  
And you could call, you could call me if you like  
So pleased to know we will get there in the end  
To leap the ride and take a step back from the edge  
From the edge  
From the edge  
From the edge  
A way of letting go, a way of saying goodbye  
A beautiful reward will come to you in time
