So where you been for so long
Did you ever stop to ask what's wrong
So hold on tight cos life speeds by
What's done is done ahead the answers lie
No sense in confrontation
Takes time to heal this tension
Just tryin' to keep me happy but all I feel is empty
And it's too bad that your homsteads lie
On battlefields where lack of space confines
So hold on to the ones you trust
Take something from the fire that's almost out
No sense in confrontation
Takes time to heal this tension
Just tryin' to keep me happy but all I feel is empty
We've got big ideas to keep ourselves alive
We've got big ideas to keep ourselves alive
But everything is going to be alright
Nice place to visit when you're being led there
Everything is going to be alright
Nice place to visit when you're being led there (for all
you know)
Everything is going to be alright
Nice place to visit when you're being led there (for all
you know)
Everything is going to be alright
No sense in confrontation
Takes time to heal this tension
Just tryin' to keep me happy but all I feel is empty
I've been addicted to long, by now were set up for the
fall
Just trying to keep me happy, but all I feel is empty
All I feel is empty
