I'm running and I feel times running out
There were twelve of us, we're down to seven now
I'm fearing exhaustion
The temperature is dropping down
Is anybody with me now?
All I really wanted was the cure

Something was written
They tried to erase us
Now that they govern here to contain us
Bodies were lifted
Well past the stages
And like the virus, We're much too contagious
Are we over?

Now we're fighting, there's no way that this is real
We are not actors, this is no movie reel
The dead were all rising
The federations heresy is now the state emergency
I want my family
Thirty seven hours now, the whole world's rearranging
My live heartbeat's changing
This wasn't me now
This isn't me

We're not getting out so much for getting out
They built up the walls and left us for ruins

There's no use standing
We were all falling out
We're over
There's no use standing
We were all falling out
We're overdue
