Let my hands down  
They are marrowless  
Disquietly they search the way  
They can not lead you anymore  
They can not lead you anymore

Let them starve  
They want to be lead by someone else  
Life line guides death  
Death guides up and deeper down

Still life fades  
A prostration  
Feet don't bear anymore

This is what we strive for  
This is our will  
Will is us  
Versus

It is here  
It is here

It is here  
Graciously it sinks  
Don't leave me now  
Where is all the blood  
When I'm gone

Do not deride him  
Is it that you strive for  
We are nothing but men  
Following the shadow
