Right now I've got nothing to say to you  
You think you've got me figured out but I can see all  
your doubts  
And now we met here in this place and truly come face  
to face  
Face to face, I wont back down  
Face to face, I'll win this battle  
I will be done and forget you  
Just look what you've come to  
You're face is at my feet, no longer face to face  
No longer face to face  
You can't bring me down  
I will always be victorious  
I've got you eating dirt  
You can only look up at me now  
Cuz we're no longer face to face  
FACE TO FACE
